A. Mean hs-cTnT concentration (ng/mL)

B. Mean CK concentration (uL/mL)

C. Change lowest to highest hs-cTnT concentration (ng/mL)

D. Change lowest to highest CK concentration (uL/mL)

Mean hs-cTnT concentration:
- Controls: 10, 100, 1000, 10000, 100000
- Exercise: 10, 100, 1000, 10000, p = 0.027

Mean CK concentration:
- Controls: 10, 100, 1000, 10000
- Exercise: 10, 100, 1000, 10000, p = 0.028

Change lowest to highest:
- hs-cTnT: p < 0.001
- CK: p = 0.005
