Data are presented as median $\left(25^{\text {th }}-75^{\text {th }}\right.$ percentile) for continuous variables, and $n(\%)$ for categorical variables.

* P-values were obtained with a Mann-Whitney U test for continuous variables and a Pearson Chi-square test for categorical variables; statistical significance ( $\mathrm{p}<0.05$ ) is indicated in bold.
${ }^{\dagger}$ The total population includes 5 gender-neutral runners and 2 runners who did not fill in their gender.
