

Fidelity, tolerability, and safety of high intensity training after hospitalisation for COVID-19**Online Supplemental Figures**

Frederik Foged, Iben Elmerdahl Rasmussen, Josephine Bjørn Budde, Rasmus Syberg Rasmussen, Villads Rasmussen, Mark Lyngbæk, Simon Jønck, Rikke Krogh-Madsen, Birgitte Lindegaard, Mathias Ried-Larsen, Ronan M. G. Berg, Regitse Højgaard Christensen

Online Supplemental Figure 1. Graphic overview of the heart rate response to each protocol. Each dot is the HR (least squares means) at the end of each interval/rest period. The dashed line is absolute heart rate with the shadow being 95% CI and the dotted line is % of HR_{max}.

Online Supplemental Figure 2. Graphic overview of the rate of perceived exertion (RPE= of each protocol. Each dot (least squares means) is the RPE at the end of each interval/rest period.
